PROFILE

Computer Science student specializing in Artificial Intelligence with a robust foundation in engineering data-driven solutions and intelligent algorithms. Experienced in machine learning model development, data preprocessing, and full-stack integration. Proven track record of training predictive systems, implementing core statistical models, and deploying analytical workflows to deliver user-centered automation. Seeking engineering roles at data driven organizations where measurable outputs matters.

EXPERIENCE

AI / Machine Learning Developer

Freelance / Project-Based | Remote

06 Months

- Designed, trained, and evaluated predictive models using Python, scikit-learn, and pandas to extract actionable insights and trends from datasets.
- Built and deployed interactive AI applications and analytical forecasting dashboards utilizing Streamlit.
- Implemented core regression and classification algorithms, focusing on feature selection, data preprocessing, and pipeline optimization.

Frontend Developer Intern

K2Peak Technologies | Skardu, Pakistan

01/2022 – 07/2023

- Designed responsive user interfaces using HTML, CSS, JavaScript, and WordPress to streamline web experiences.
- Collaborated in UI/UX optimization strategies and conducted cross-browser compatibility testing.
- Utilized Git and GitHub for version control, collaborative code reviews, and structural team deployments.

EDUCATION

BSCS (Artificial Intelligence)

09/2023 – Present

BIIT (Barani Institute of Information Technology) | Rawalpindi, Pakistan

HSSC (Pre-Engineering)

04/2019 – 05/2021

Degree College Skardu | Skardu, Pakistan

SSC (Science)

03/2017 – 04/2019

Public School and College Skardu | Skardu, Pakistan

SELECTED TECHNICAL PROJECTS

Stock Market Prediction Model

Python, Scikit-Learn, yfinance, Streamlit

- Developed an end-to-end predictive framework to forecast equity market trends using historical data indicators.
- Trained a Linear Regression architecture and built an interactive Streamlit application to visualize real-time performance metrics.

Healthcare Platform with Integrated AI Chatbot

Node.js, Express.js, JavaScript

- Engineered a full-stack digital health application featuring practitioner registration workflows and conversational assistance.
- Structured a reliable, secure backend API layer in Node.js to manage data parsing and conversational flows safely.

Enterprise Point-of-Sale (POS) System

C# WinForms, MS SQL Server

- Designed a database in 3rd Normal Form (3NF) using stored procedures and triggers to keep data safe.
- Implemented desktop modules for inventory control, transaction billing, secure role-based permissions, and tabular compliance reporting.

Data Structures & Algorithm Implementations

C++, Java

- Coded custom data structures like linked lists, stacks, queues, and trees from scratch.
- Focused on solving problems efficiently using recursion and keeping track of time complexity.

TECHNICAL SKILLS

AI/ML Core:	Model Building (Regression & Classification), Data Preprocessing, Feature Engineering, OOP, Data structure, Agile Method
Languages:	Python, JavaScript, SQL, C++, Java, C#, Assembly
Tools & Libraries:	pandas, scikit-learn, Streamlit, Git, GitHub, MS SQL Server,

CERTIFICATES & CORE COMPETENCIES

- **Certified Frontend Developer** – DPAK-IT Skardu
- **Core Competencies:** Logical Analysis, Object-Oriented Programming (OOP), Relational Database Design, Agile Team Collaboration

LANGUAGES & INTERESTS

Languages:	English, Urdu
Interests:	AI Automation, Scripting, Abstract Problem Solving, Technical Literature & Book Reading
